React, Spring Boot, Java Spring, Node.js, MySQL, PostgreSQL, BitcoinJ, EthereumJ

Services:

Web Application Development, Mobile Application Development

Industries:

Banking & Finance, Blockchain

SC&

Blockchain for the Logistics Industry

SCAND team created a cargo shipping system based on blockchain, ensuring anonymity for players, publicity of transactions, and automation of processes.

While payments in the system are available only with tokens, the Clearing Bank provides a final token exchange to fiat currencies, ensuring real money for companies.

SCAND team developed a solution for giant shipping corporations that provides security and anonymity of data of its users, as well as publicity of transactions. Each transaction is analyzed by the system to allow companies cut costs on unneeded shipments.

Mobile Application Development, Hybrid Apps

Industries:
Banking & Finance

Personal App for Clients of Pension Fund or Bank

Personal Account is a native mobile app solution capable of reducing time expenses on data search and giving its users all essential financial info. The app runs on Android and iOS devices.

Our mobile app developers made personal accounts for a pension fund and banks available on mobile. The Personal Account native app gives users the information about their agreements and transactions in a few clicks.

Technologies & Platforms:
Java, Mobile, Objective-C, Android SDK, iOS SDK, GPS, iOS, Android

Services:
Mobile Application Development, Native Apps
